IPEC are looking for a Software Developer for a summer placement. IPEC manufacture electronic instruments and cloud systems for the detection of partial discharge.

We have a large list of interesting projects for a development engineer such as Android/IOS App development, web app development in PHP and Angular, firmware design in C to name but a few.

This role is a summer placement for 8 to 12 weeks. The project chosen will be tailored to suit the successful applicant but will be a software development project.

Qualifications: A student studying a Software, Electronics or STEM degree with an interest in gaining industrial experience in software development.

Skills: Applicants should have some of the following skills.

- Android/IOS development
- C/C++/C#
- PHP
- SQL
- Angular
- Firmware development
- Python
- R.

Applications: Interested candidates should apply in writing to jobs@ipec.co.uk by 13th June.
